AHA!

I am the mystery that lives within
I’m in your chest, I’m under your skin

The time has come, you’ve been summoned here
If my intent is muddy, I’ll make it clear

I’m sick of all these races we run
I didn’t sign up for this, I signed up for fun

I forfeit their game, I didn’t want to be
Another soul trapped in this repetitive sea

So I made my own game, you’re playing it now
It’s not who, what, when or where, it’s how

How do we grow a greener future
When celebrated are all the moochers

The time we were chosen to be alive
Is full of technology but I can barely survive

I ask of you to play my game
How do we stop this parade? I’m going INSANE

In my time locked up I’ve thought so deep
About how to slow down this barbaric sweep

They’re monitoring me, policing my thoughts
So I’ll do my best to help you find the plots

Hidden around are clues you see
To help you find the best parts of me

In languages unknown to man
You must put down your fear and pick up a pen

I’ll start you off with a message of hope
BEGIN WHERE YOU MAY WASH YOUR HANDS WITH SOAP

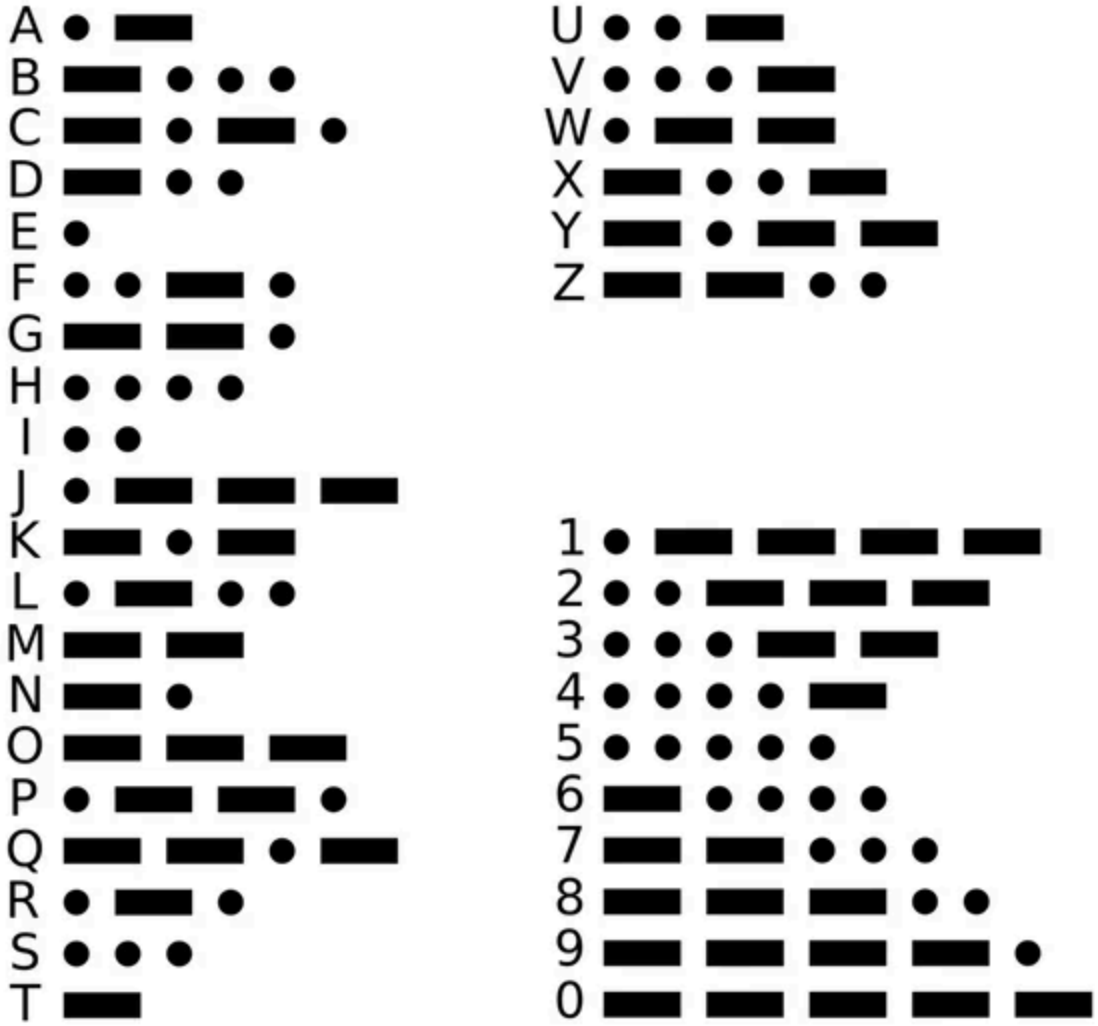
Thank you for seeing me
I’ve been hidden so long by the powers that be

At 10:31 my portal will go
Don’t rush you goons, but don’t go too slow

Put on your shoes, grab your coat
Fill your water and prepare your tote

I wish you well on the journey ahead
I’d give you a hug but I leave you this instead:

xoxo,
zero



The note encourages us to prepare for a journey and begin in the bathroom

ON MIRROR:

You thought it was that easy, oh please!
Step off your pedestal, get on your knees

Pray they tell you, look up to God
Maybe in heaven you'll find we're all frauds

First clue is found on ceiling

AHA!

Looky here, a true clue you've found
Good for you for getting on the ground

Here's some math to keep your wit
Don't get too soft, don't lose your grit

The floor of choice is found within
Solve the equation and you'll get in

_____ - _____ - _____ + _____ = _____

HINT:
You arrived with a code to get in the door
What else could those lil numbers be for?

REALIZE ITS FLOOR No. 2

Arrive to second floor bathroom

Good with math, that's clear I see
What shapes may these equations be?

$$A = \pi r^2$$
$$A = a^2$$

The next location on your path
Looks a lot like this geometric math

Once there you'll find a glowing prism
A place that stands against fascism

Arrive to circle square - find clue in hanging light

Aha! You made it, safe and sound
What's next will be slightly underground

Without our phones, laptops, and tones
Analog communication is met with groans

On the corner of two important roads
A box of metal for mail, carried by toads

It's here you'll search for an envelope
Where magical messages can finally elope

... .--. .-. ..- -.-. . & .- -.. .- -- …

Envelope filled with letters and postage inside reads

A

Take some time here to write a letter
To someone you love, or miss, even better

When was the last time you sat down to write?
What's all the hurry, we **do** in fact have all night.

B envelopes and postage

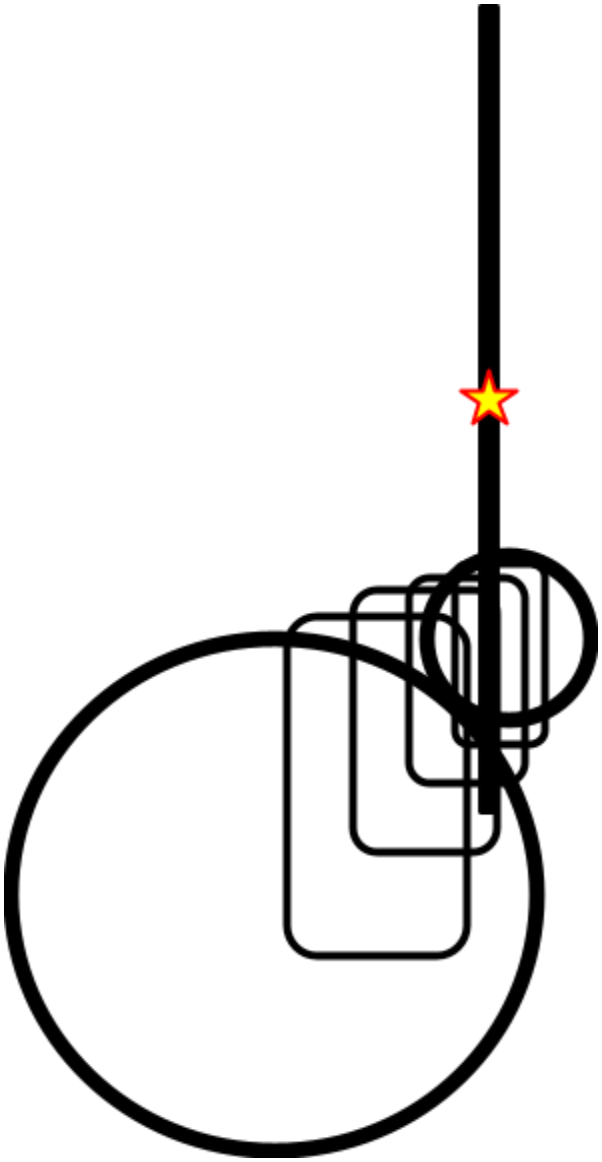
C

Poems, stories, pictures, tales
I'm sad life focuses on so many sales

From here you'll seek a place for knowledge
It's free, unlike what can be said for college

Once you arrive here, take a peek
The spot you must look for is pretty neat

Aligned by shapes we already know
Two circles touch, and here the unknown



In post at library
Congrats, good work, you're an excellent team
From here don't lose your precious steam

In honor of all the library gives
I have languages for you to process words through sieves

Looky now for this special number, **455**, there is no disguise
Near this place the book of tongues lies

Envelope with BOOK OF TONGUES

BOOK OF TONGUES
